

ACVATIX™

Electromotoric actuators

SQR35.00

SQR85.03

SQR65

for Combi valves VPI45..., DN40/50

-
- **SQR35.00** operating voltage AC 230 V, 3-position control signal
 - **SQR85.03** operating voltage AC 24 V, 3-position control signal
 - **SQR65** operating voltage AC 24 V, DC 0...10 V control signal or 0...1000 Ω
 - Positioning force > 400 N
 - Direct mounting on valves; no adjustments required
 - Optional auxiliary switch for extra functions with SQR35.00, SQR85.03
 - Direction of movement indication
 - Manual adjuster

Use

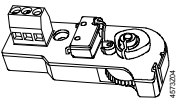

For operation of Siemens Combi valves VPI45..., DN40/50 with 6.5 mm stroke for water-side control of low temperature hot water and cooling water in heating, ventilation and air conditioning systems.

Type summary

Type	Operating voltage	Positioning signal	Positioning time
SQD35.00	AC 230 V	3-position	170 s
SQD65 ¹⁾	AC 24 V	DC 0...10 V, 0...1000 Ω	43 s
SQD85.03 ¹⁾		3-position	

1) UL approved versions: SQD65UG, SQD85.03UG (AC 24V, 3-position, 43 s)

Accessory

Type	Description	For actuators	Space for
ASC9.6 	Auxiliary switch. Switching point adjustable from 0...100 % stroke	SQD35.00 SQD85.03	1 x ASC9.6

Ordering

Example:

Product number	Stock number	Designation
SQD35.00	SQD35.00	Electromotoric actuator, stroke 6.5 mm
ASC9.6	ASC9.6	Auxiliary switch

Delivery

Actuators, valves and accessories are supplied in separate packages.

Spare parts, Rev.-Nr.

See overview, page 8.

Equipment combinations

Valve type	DN	PN-class	V [l/h]	Data sheet	SQD35.00	SQD65	SQD85.03
VPI45..	40 / 50	PN 25	2300...8500	N4853	✓	✓	✓

Technical / mechanical design

The reversible synchronous motor is driven by a 3-position or a proportional DC 0...10 V or 0...1000 Ω control signal. The stroke is generated via an antilocking gear train.

4540201

- 1 Manual adjuster (SQD35.00, SQD65, SQD85.03)
- 2 Direction of movement indication
- 3 Coupling nut M30x1.5 for valve neck
- 4 Housing
- 5 Removable cover

4540205

SQD35.00

- 1 Terminal strip

4573219

SQD85.03

- 1 Terminal strip

4573205

SQD65

- 1 Terminal strip
- 2 «lin» / «log» connection
- 3 R – M bridge

SQD35.00, SQD85.03

3-position control signal

- Voltage at Y1:
- Voltage at Y2:
- No voltage at Y1 or Y2:

Stem extends, valve opens

Stem retracts, valve closes

Actuator holds the current position

SQD65

DC 0...10 V or
0...1000 Ω control signal

- The valve opens / closes in proportion to the control signal at Y or R.
- At DC 0 V or 0 Ω the valve is closed (A → AB).
- When power supply is removed, the actuator maintains its current position.

Selecting the flow characteristic

Connector S1 (under the cover, on the printed circuit board) can be repositioned to change the flow characteristic of valves from "equal percentage" to "linear"; in all cases the flow characteristic relates to the through-port of the valve.

Position of S1

S1 connected to A and C:

S1 connected to B and C:

equal-percentage flow characteristic

linear flow characteristic

Flow characteristic

Relationship between the DC 0...10 V or
0...1000 Ω positioning signal and the
volumetric flow rate

Control signals:

Y = DC 0...10 V

R = 0...1000 Ω; cut through R – M bridge

Flow characteristic

log = Equal-percentage valve characteristic
(factory setting)

lin = Linear valve characteristic

Flow range

V_{100} = Volumetric flow 100%

V_0 = Volumetric flow 0 %

Priority of signals

Positioning signal Y	DC 0...10 V		DC 0...10 V
Signal R		0...1000 Ω ¹⁾	0...1000 Ω ¹⁾
Position / stroke	The Y positioning signal is valued.	The R signal is valued.	Signal addition Y and R
Position feedback U	DC 0...10 V	DC 0...10 V	DC 0...10 V

¹⁾ Use with 0...1000 Ω signal indicator, e.g. frost protection. For details see connection diagram.

Features and benefits

- Electromotoric actuator, maintenance-free
- Reversible synchronous motor
- Antilocking gear train
- Load-dependent switch-off in stroke limit positions

Engineering notes

The actuators must be electrically connected in accordance with local regulations and the connection diagrams.

Caution ⚠

Safety regulations and restrictions designed to ensure the safety of people and property must be observed at all times.

Admissible temperatures refer to "Technical data" (page 5).

If an auxiliary switch is required, its switching point should be indicated on the plant schematic.

Mounting notes

Mounting Instructions are enclosed in the product packaging.

Overview mounting instructions

Type	Mounting instructions
SQD..	M4540
ASC9.6	G4573.1

Installation notes

Orientation

Commissioning notes

When commissioning the system, check wiring and the functions. In addition, select or check the auxiliary switch settings.

Manual adjuster 

Switch off the positioning signal.

The valve can be fully closed (= 0 % stroke) by turning the manual adjuster counter-clockwise. Control is automatically resumed when the positioning signal returns.

3-position control

Every actuator must be driven by a dedicated controller (refer to "Connection diagrams", page 6).

Maintenance notes

The actuators are maintenance-free.

When servicing the actuator:

- Switch off pump and power supply
- Close the main shutoff valve in the pipework
- Release pressure in the pipes and allow them to cool down completely
- If necessary, disconnect electrical connections from the terminals

The actuator must be correctly fitted to the valve before recommissioning.

Repair

The actuator can not be repaired. It has to be replaced as a complete unit.

Disposal

The device contains electrical and electronic components and must not be disposed of together with domestic waste. This applies in particular to the PCB.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

Warranty

The technical data relating to specific applications are valid only in conjunction with the valves listed in this Data Sheet under "Equipment combinations", page 2.

The use of the actuators in conjunction with third-party valves invalidates all claims under Siemens Switzerland Ltd / HVAC Products warranty.
