

Installation

Installation locations

Examples of installation. In pipes of a small section the axis line of the duct must be reached and if possible slightly exceeded by the tip of the probe (=U).

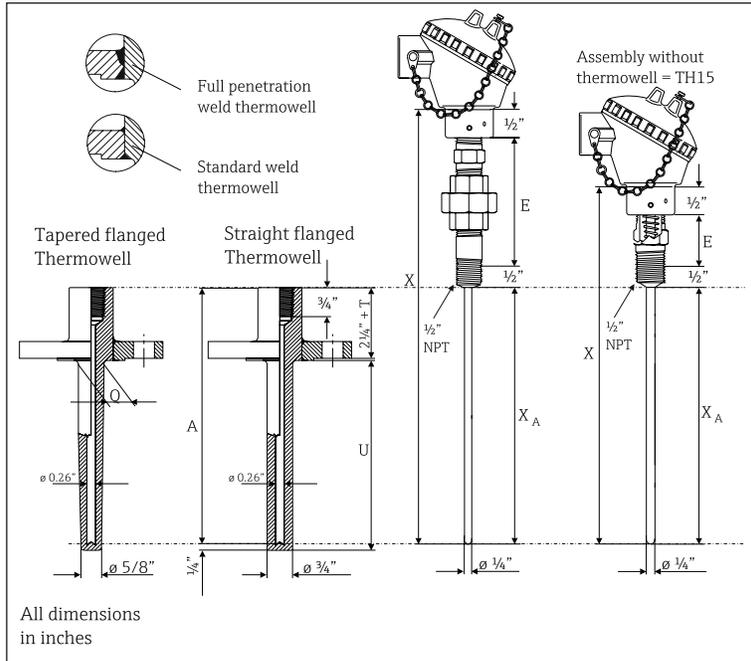

- A: Pipe installation
B: Container installation

For installation proceed as follows:

1. Attach thermowell to pipe or process container wall. Install and tighten the Thermowell before applying process pressure.
2. Make sure that the process fitting matches the maximum specified process pressure.
3. Seal the extension nipples with TFE tape before screwing the sensor into the thermowell.
4. Thermowells are used in measuring the temperature of a moving fluid in a conduit, where the stream exerts an appreciable force. The limiting value for the thermowells is governed by the temperature, the pressure and the speed of the medium, the immersion length, the materials of the thermowell and the medium, etc. For operating conditions, a stress calculation should be carried out.

Dimensions

for TH14 assembly with spring loaded insert and self contained nipple.

U = Thermowell Immersion length (see table)

E = Extension (see table)

T = Lag dimension

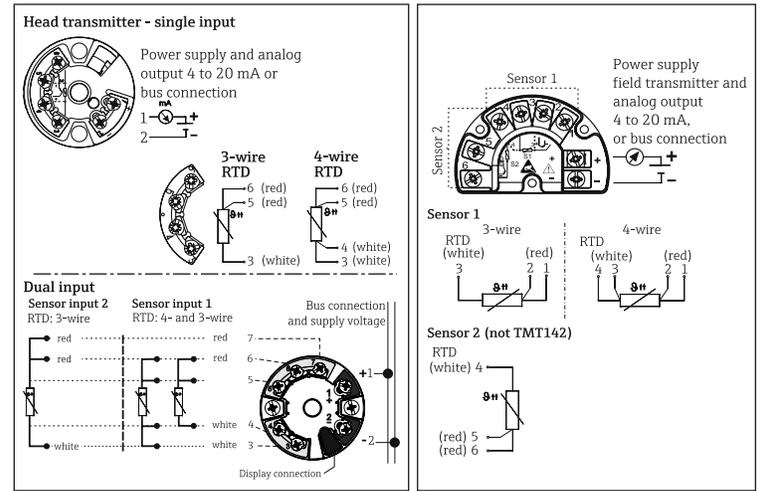

Q = Thermowell diameter (see table)

$X_A = A =$ Immersion length RTD sensor = thermowell drilled depth ($U + 2" + T$)

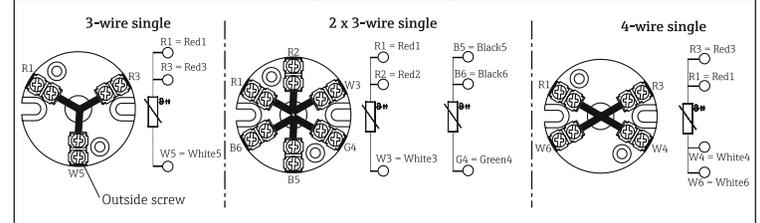

X = Insert overall length ($X = A + E$)

Electrical connection-wiring diagrams

Transmitter mounted (3" or 5½" flying leads - crimped sleeves)

Terminal block mounted (3" flying leads - fork lugs)

The blocks and transmitters are shown as they will sit inside the heads in reference to the conduit opening. ALWAYS terminate leads to the outside screw!

Flange rating: ASME B16.5				
U	E (nom. dimension)	T	Flange size	ø Q
2", 4", 7", 10"; 13"; 16"; 22"; specified length 2" to 18" in ½"	Hex nipple = 1" or Nipple Union Nipple (NUN) = 4" or 7" Material: Steel or 316SS	specified length 1" to 10" in ½" increments	1" 1½" 2" 3"	7/8" 1 1/16" 1 1/16" 1 1/16"

Wire specifications 24AWG, 19 strand silver plated copper with 0.010" TFE extruded outer

Recommended minimum immersion for thermowell:

Tapered TW = 4½"	¾" straight TW = 4"
------------------	---------------------

Technical data

Weight From 1 to 10 lbs
Material Wetted parts 316 SS
Shock and vibration resistance 4g/2 to 150 Hz as per IEC 60 068-2-6

Ambient temperature limits*

Housing without head-mounted transmitter	
Aluminium pressure die-cast housing	-40 to 300 °F (-40 to 150 °C)
Plastic housing	-40 to 185 °F (-40 to 85 °C)
Deep drawn SS housing without display	-40 to 300 °F (-40 to 150 °C)
Housing with head-mounted transmitter	
Deep drawn SS housing with display	-4 to 160 °F (-20 to 70 °C)
Field transmitter	
with display	-40 to 158 °F (-40 to 70 °C)
without display	-40 to 185 °F (-40 to 85 °C)

*For hazardous areas refer to the transmitter control drawing
